

Prohibition on Fluorinated Chemicals

BPI passed a [policy](#) in 2017 that prohibits the intentional use of fluorinated chemicals in BPI certified products by January 1, 2020. This is demonstrated with three criteria: 1) The product formula must not have fluorinated chemicals — as evidenced by safety data sheets for all ingredients; 2) Test results from an [approved lab](#) showing a maximum of 100ppm total fluorine (unless demonstrated to be from naturally occurring fluorine); and 3) The statement below of no intentionally added fluorinated chemicals, signed by the manufacturer.
